Accreditations

At Detectamet we take our business very seriously, which is why we are ISO accredited in 9001: Quality Management, 14001: Environmental Management and 45001: Occupational Health and Safety Management

Detectable Pen and Marker Selection

Detectamet's detectable pens are manufactured from a specially formulated **food contact approved polymer** and combine **metal and X-ray detectability**.

The bodies of our pens are flexible and shatter-proof, making them ideal for use in food processing plants to help achieve safety and compliance. For customers, auditors and inspectors, the use of detectable stationery is an excellent indicator of due diligence in the prevention of foreign body contamination.

We manufacture & distribute pens that are able to write on a variety of surfaces, including glass, metals, food, whiteboards and most plastics as well as card and paper. Detectamet can even provide pens with the ability to write through grease and in cold stores. We can personalise our metal detectable pens to suit your company needs.

Your pens can be branded or numbered for traceability - please speak to our friendly team for more information.

Detectamet Pens - Features & Capabilities

Take a look at our key to learn more about our pens and their capabilities

General

Detectamet's pens are ergonomically designed for long periods of use.

Chilled

Our gel pen works in low temperatures, ideal for use in chilled areas.

Freezing

Our cryo pens can write in extremely low temperatures down to -20°C (-4°F) in areas such as cold stores.

Wet/Damp

Our specially developed Detectamet Cryo Pens won't smear when used on damp surfaces.

Powdery Environments

Our Cryo Pens will continue to write even in powdery environments. This is most useful in mills and bakeries.

Enclosed Environments

For tight environments you need a pen that can write at unusual angles - our cryo pens are perfect for this.

Wipeable

Our whiteboard pens write clearly whilst being easy to wipe off.

Meat/Food

Our meat/food ink can mark your product and is also safe to consume. Marking meat and food is essential for tracking produce.

Packaging

We have a wide range of marker pens for clearly visible, accurate marking to suit all your requirements.

Labels & Tags

Our fine marker allows you to write clearly on a waxy surface permanently.

Touch Screen

Our range of styluses are suitable for passive and capacitive touch screens.

One-Piece Pens

Our most BRCGS-compliant pen style, conforming to 'Global standards for food safety' section 4.9.6.2.

Split Ring

Many of our pens can be attached to a split ring, safety chain or lanyard.

Refillable

Many of our pens can be refilled to reduce waste. Please see our refill selection on page 11.

Ask us about pad printing or laser engraving our detectable pens for added traceability!

Detectamet Fully Metal & X-Ray Detectable Refill

The world's first fully detectable refill

Our fully detectable refill is one of a kind - manufactured from our metal & X-ray detectable polymer.

Designed to reduce detectable plastic waste

Using our detectable refills reduces detectable plastic waste by 75%.

Detectable throughout

Every component of the refill is detectable, including the housing and end cap.

Well suited

Our standard & fine-tip ink refills are perfect for ambient conditions: 0°C up to 30°C (32 to 86°F). For writing in more extreme conditions, take a look at our Cryo refill on page 16.

Patented product

Our fully metal & X-ray detectable refill is patented under publication no. WO 2020/188263.

Compatible

Our fully detectable refill is compatible with our best-selling HD & Elephant Pens, as well as with our metal retractable & stick pens.

Long lasting

Our standard & fine tip refills continue writing for approximately 9,400 m (30,840').

Shatter proof

Designed to be shatter resistant throughout to avoid small pieces entering food manufacturing lines.

Ink types & colours

Standard Ink: Available in 4 colours:

Fine-tip Ink: Available in 2 colours:

Best Selling Detectable Pens!

A strong loop

To provide users with a resilient loop for lanyard clips, safety chains or split rings.

A pocket clip that lasts

Strong and virtually unbreakable, with a natural connection and grip. Available in three different styles: With Clip, Lanyard Attachment, No Clip.

Own branding & sequential numbering

Pad printing & laser engraving leads to enhanced traceability for your products. We can add both own-branding and sequential numbering on a great range of our detectable pens.

Textured finish

Enhanced grip with an 'all over' textured surface to enable holding across a wide range of wet, dry and hot, cold or ambient environments.

Detectable throughout

Every component of the pen is detectable, including the housing, end cap, spring and refill.

Refillable

Refillable with a variety of ink options to minimise housing wastage - take a look at our refill options on page 16.

Cartridge compatibility

Standard, Pressurized, Gel and Fine-tip cartridge types will fit securely. Standard/Gel available in Black, Blue, Red and Green. Pressurized/Fine-tip available in Black and Blue.

HD Pen

Maximise end cap usefulness

Interchangeable end caps to signify the ink colour, the ink type, HACCP or seniority signifier. There are nine end cap colours available:

Reliable and easy retraction

There's a large button to deliver a smooth action with continuous easy retraction and inbuilt protection against loss of end cap.

Shatter proof

Designed to be shatter resistant throughout to avoid small pieces entering food manufacturing lines.

Retracts every time

Stainless steel spring for a smooth and easy retract every time.

Ergonomic grip

Built-in natural hold area for ease of grip with or without gloves.

Detectable housing

Metal detectable and X-ray visible pen housings meeting FDA and EU regulations for safe food contact.

Available in nine detectable colours:

Maximum strength yet lightweight

Made from our extremely strong and durable polymer whilst only weighing 13 grams.
